Subject: Conversation with DeSantis, Mike

Tully, Jennifer 10:30 AM:

Morning! I heard from Lilly, she sampled the Flint pipe a bit on Saturday. She doesn't think there will be enough of L1 so I told her to crush/sieve it and send a picture of the vial and how long she's already spent on it. Do you have another pipe she could switch to? After the Peotone call she could also do the final clean of the Peotone L1 to save you the time dealing with it, that'd be simple enough to explain.

DeSantis, Mike 10:31 AM:

Yeah, lets have her do that.

DeSantis, Mike 10:33 AM:

I might have them start washing and cutting some of the non PO4 Providence ones, so we can get on to those.

Tully, Jennifer 10:34 AM:

That's a good idea. OK, when I hear from her again I'll let her know about starting on Peotone.

DeSantis, Mike 10:34 AM:

Leah sent me an email that she and Rose went out to the pipe facility for something on Friday, but could not get back in the cafeteria loading dock door.

Tully, Jennifer 10:35 AM:

Interesting..... wonder if they've purged the list again.
